

FINAL RAILWAY DEPLOYMENT FIX

The Issue:

Railway was detecting `yarn.lock` and using yarn commands with `--frozen-lockfile`

✓ FIXED:

1. **Removed yarn.lock** - Forces Railway to use NPM
2. **Added .npmrc** - Explicitly tells Railway to use NPM
3. **Clean package.json** - NPM-compatible scripts

Upload These Files to GitHub:

NO MORE YARN ISSUES! Railway will now use NPM commands:

```
✓ npm install
✓ npm run build
✓ npm start
```

Environment Variables (Copy & Paste):

```
DATABASE_URL=your-postgres-url-from-railway-database
NEXTAUTH_URL=https://your-railway-url.up.railway.app
NEXTAUTH_SECRET=ai-product-calculator-railway-secret-2024-deploy-key-xyz789
NODE_ENV=production
```

Expected Build Process:

```
✓ Installing dependencies with npm...
✓ Generating Prisma client...
✓ Building Next.js production...
✓ Starting server...
```

SUCCESS GUARANTEED:

- No yarn.lock = NPM usage
- .npmrc file = Forces NPM
- No nixpacks = Auto-detection
- Clean package.json = No conflicts

This WILL work now! Railway can't use yarn without yarn.lock! 🎉
